

SMART PLUG-INS FOR A POPULAR DOCUMENT MANAGEMENT TOOL FOR A LEADING SOFTWARE COMPANY IN USA

Industry: Independent Software Vendor

Customer Profile

The client is an Arizona based company dedicated to providing premier document management, compliance products and services. Their solution is a web-based application for mastering all forms of document capture (scanning/imaging, fax and email), regulatory compliance systems and workflow for establishing document and form processes.

Client Situation

The client wanted to improve the market share and retain the existing customer loyalty by seamlessly integrating their premier document management and compliance solution into other popular products like AutoCAD, Adobe, SolidWorks etc. They needed smart plug-ins that must provide the core document management functionalities and the user must have a seamless experience

Congruent's Solution

Congruent designed and developed the smart plug-ins that could be easily plugged to 3rd party products like AutoCAD, SolidWorks, Adobe etc. The plug-ins had all the relevant document management functionalities like check-in, check-out, version control etc. With this plug-in in place, the users will enjoy all the document management features within their favorite product environment, without logging into document management application.

Benefits

- Out smart the competition by providing more value to the customer
