## Congruent's ISV/Product Development Services

- Concept Validation and Prototyping
- Cloud Engineering and Development
- Custom Development and Enhancements
- App Modernization
- User Experience (UX) Development
- Quality Assurance (QA) and Testing
- Deployment & Maintenance

## Some ISV Success stories

- Revamp/re-write of a legacy system to a web based .Net product for a land/property tax management and GIS software provider to cities and county governments in the USA. We helped with enhancements and automated tools to create 3D vector data using spatial data type integrating with other apps.  
*Duration:* 36 months with up to 12 resources
- Enhancements and support of a CPQ product in Salesforce and Dynamics for a Revenue Lifecycle Management Solution provider with emphasis on improving usability, performance tuning and reverse engineering.  
*Duration:* Ongoing since 2016, with up to 12 resources
- Extended development teams working on a proprietary asset management platform in Salesforce and Microsoft Power Platforms for a renewable energy asset management software vendor. We provide support and mobile native user experience for field service management, and data visualization accessing near real-time data with geo-fencing.  
*Duration:* Ongoing since 2018, with up to 8 resources
- Extended the platform for a digital loan origination service provider offering personal loans and other financial services to retail and online (with effective risk assessment and fraud detection engine) to iPads and Kiosks hastening the company's digital transformation journey and enhancing user adoption.  
*Duration:* 9 months with 4 resources

## Customer Speak

*"Congruent has made huge strides forward in the last few months. They're doing good work, and they are staying engaged with the whole team despite the distance and time difference."*
